

General Information

Under what Clean Technologies Program Focus Area(s) are you submitting project(s) for consideration (See Sections 2 & 3)?

- Alternative Fuel Refueling Stations
- Idle Reduction Infrastructure Facility
- Demonstration & Pilot Projects

Attachments

For vehicle/equipment demonstration or pilot projects, engine/retrofit specifications and any applicable or anticipated certifications or industry standards documents must be included. For refueling facilities, fuel specifications and a copy of the applicable fuel/equipment industry standards must be included. For refueling or idle reduction infrastructure, permitting, code, and site documentation is required, to the extent possible. Vendor quotes must be provided for all projects. Additional pertinent documentation may be included by checking “other” and listing what type of documentation it is.

- Engine/Retrofit Specifications
- Engine/Retrofit Certification(s)
- Copy of Vendor Quote(s)
- Fuel Specifications
- Applicable Fuel/Equipment Industry Standards
- Permitting & Code Compliance Documentation
- Site Drawings/Engineering Schematics
- Supporting Documentation for Assumptions Used in the Fleet Inventory (see Application Form B1 and/or B2 for more information)

- Other:
